

Mandie Morgan

Technical Product & Engineering Leader

Platform Modernization | AI Strategy | Enterprise Delivery | Aubrey, TX | amanda01cj@icloud.com

LEADERSHIP PROFILE

Engineering and technical product leader with 11+ years of experience delivering enterprise technology initiatives across software engineering, product management, platform modernization, and technology operations. Trusted partner to executives, architects, engineering managers, vendors, and development teams, known for transforming ambiguity into execution, aligning business strategy with technical delivery, and building high-performing organizations through operational excellence. Brings a differentiated leadership brand at the intersection of AI-enabled software delivery, platform transformation, product strategy, and people development.

PROFESSIONAL EXPERIENCE

State Farm Aubrey, TX / Hybrid
Sales Lead - MernaPAS Platform Transformation Aug 2025-Present

- Lead enterprise platform transformation across vendor engineers, internal developers, architects, QA, and business stakeholders, aligning complex Sales and Service modernization workflows.
- Partner with engineering leadership to define technical scope, remove blockers, prioritize delivery, and maintain executive visibility across program risks, dependencies, defects, and rollout readiness.
- Pioneered AI-assisted engineering analysis using GitHub Copilot and LLMs across production repositories, accelerating technical discovery and requirements validation.
- Drive backlog prioritization, release planning, and dependency management across 60+ cross-team commitments while balancing engineering capacity, stakeholder needs, and business outcomes.
- Lead defect triage and production issue prioritization, ensuring critical customer-impacting issues receive the right urgency and ownership.
- Translate architecture, data flows, payloads, and integration behavior into executive-ready communications that enable informed technology and business decisions.

State Farm Aubrey, TX / Hybrid
Horizontal Product Owner - Shopping Journey Auto Dec 2022-Jul 2025

- Led delivery of the Simplified Auto Sales Agency UI, generating 2.5M quotes in 2024 while increasing quote starts 13%, completed quotes 17%, and purchases 53% vs. Policy Center.
- Built a multi-year product and engineering roadmap supporting platform modernization, state rollout, and scalable Sales Agency enhancements through Q4 2027.
- Coordinated engineering execution across delivery teams while balancing customer needs, stakeholder priorities, technical debt, and platform scalability.
- Partnered with architects and senior engineers to influence solution design, simplify implementation, and reduce delivery risk across critical integration work.
- Developed workforce planning recommendations that optimized engineering capacity and informed leadership hiring and resource allocation decisions.

State Farm Aubrey, TX / Hybrid
Portfolio Analyst - Auto Acquisition & Service Feb 2022-Dec 2022

- Modernized engineering documentation by building a searchable knowledge platform using MkDocs with CI/CD deployment, reducing tribal knowledge and improving onboarding.
- Coordinated backlog prioritization across multiple engineering teams and resolved 60+ cross-functional dependencies to improve sequencing, transparency, and delivery flow.
- Led migration from Agility to GitLab, standardizing technical requirement documentation and increasing visibility into portfolio progress and engineering execution.

State Farm Aubrey, TX / Hybrid
Technology Supervisor / Technology Analyst - IT Operations Apr 2018-Feb 2022

- Led technical recruiting strategy that increased intern-to-full-time conversion from 46% to 92%, expanded the candidate pipeline by 70%, and reduced annual hiring costs by more than \$150K.
- Built an AWS-powered recruiting application that automated resume parsing, candidate scoring, and role matching, eliminating manual screening and improving hiring efficiency.
- Coached interns and early-career technologists while partnering with leadership on workforce planning, talent development, and organizational growth.

ENGINEERING & AI PROJECT

Engineering Analytics Platform | Personal Technical Project

- Designed a React-based engineering analytics platform to analyze activity across multiple GitLab repositories and surface delivery health, development activity, defect trends, and status insights.
- Explored API integrations, caching strategies, data persistence, and AI-assisted analysis to convert repository activity into operational reporting for engineering leaders.

COMMUNITY LEADERSHIP

ITSMF Emerge Academy (2025) | University of Dallas Recruiting Lead | Directed 25+ DFW hackathons engaging 7,000+ students

EDUCATION & CERTIFICATIONS

Millikin University | B.S., Information Systems & Accounting | May 2015
Certified ScrumMaster (CSM) | Scrum Alliance | Sep 2021
